A Mighty Good Pool

The Minnow pool near Beggs Oklahoma is really one of the most interesting new pools that have been opened in the Mid-continent. It is open in the northwest corner of the state. There have been four wells completed and the production from the four wells is around 3,000 barrels, which is indeed mighty good news. Instead of decreasing as the wells usually do with a little deeper drilling every now and then a nice big increase is shown. The Black & Simon well was brought in about two months ago and is now 27 feet in the sand and is making 1,800 barrels. The Walter Phillips well No. 1 is 15 feet in the sand and for the last 24 hours made 1,500 barrels. It will be drilled deeper within the next two or three days. The Cushing No. 1 is 12 feet in the sand and is making 1,200 barrels. The Blue Mountain well is 27 feet in the sand and is making 1,100 barrels. The Walter Phillips well No. 1 is 15 feet in the sand and for the last 24 hours made 1,500 barrels. It will be drilled deeper within the next two or three days. The Cushing No. 1 is 12 feet in the sand and is making 1,200 barrels. The Blue Mountain well is 27 feet in the sand and is making 1,100 barrels.

During the past few days these wells have been drilled a little deeper for an account of pipe-line difficulties and tankage facilities they have been delayed in drilling in the Texas company has a line practically completed to this new pool and the Cushing concern is making arrangements to put a line in this pool, which will give them the necessary pipe facilities and then the wells will be drilled in due time. These are truly a mighty increase in production and we received and remind one of the good old Cushing days, which made oil history for Oklahoma.

It looks as though the deep sand in the Okmulgee and Beggs district is going to prove out all over that part of the country and so it will be another Cushing and Texas won't have a rhyme on Oklahoma. In fact Oklahoma is more in the foreground than Texas has ever been and there is more money to be made for the small man here, if it costs a fortune to drill that deep stuff in Texas.

Late News From Setby Pool

W. G. Skelly No. 1 M. Bittle in 11-10-10 got top of the sand at 2,800 feet and well is good for 420 barrels. No. 2 is spudding. No. 3 is spudding. No. 4 is spudding.

The same party No. 1 Spences in the northeast corner of 15-15-10 is spudding.

The Setby Oil & Gas Co. No. 1 Robins in 10-15-10 is drilling at 2,200 feet.

The same company No. 1 Tiger in 10-15-10 is drilling at 2,350 feet.

The same company No. 3 M. Thomas in 10-15-10 is a location. No. 4 is a location.

Alexander Gets Good Well at Beggs

The Alexander well No. 3 in the southeast of southwest of 4-14-12 got top of the sand at 2,200 to 2,300 feet and well is good for 300 barrels.

Good Well in Garber District

The Conite Oil company No. 1 Lund in 7-22-10 got top of the sand at 1,540 to 1,572 feet and well is making 700 barrels.

Logan and others No. 1 Westcott in the southeast of southwest of 6-21-10 is drilling at 3,750 feet.

The Braden Oil & Gas Co. No. 1 Bradford in the southeast of the northwest of 11-22-10 is spudding.

The Atlantic Petroleum company No. 7 Wibard in the center of the east line of the west half of the southeast of 12-22-10 has rig up No. 8 in the center of the east line of the northwest of southeast is a rig.

The Conine Oil company No. 1 Ritter in the southeast of southwest of 12-22-10 is drilling at 1,340 feet.

Cushing Oil & Gas Co. No. 4 Dinkin in the center of the east line of the southwest of 12-22-10 is drilling at 1,184 feet. No. 5 is a rig.

The Prairie Oil & Gas Co. No. 3 Wibard in the northeast of south east of 12-22-10 is underreaming 18-inch casing at 1,120 feet. No. 7 is drilling at 1,160 feet.

The Roxana No. 11 Wolfe in the southwest of northwest of 12-22-10 has rig on the ground.

The Minnehaha Oil company No. 2 Divis in the northeast of southwest of southeast of 14-22-10 is drilling at 1,750 feet.

The same parties No. 1 Smith in the northeast of southeast of southwest of 23-22-10 is underreaming 15-

inch casing at 1,120 feet. No. 8 is drilling at 1,160 feet.

The growth of the city makes necessary the actual operation of the "Cedar" switchboard. In phasing a call gives the correct prefix as shown in new book—Adv.

Note. Beginning August 1st all team-work out of Beggs will be \$12 per day.

Oil production have market for 100 to 5,000 barrels daily. Phone 3074 or 7830.

Have cash ready to buy for land and oil royalties. Give full particulars, with age of wells, income from last year, price, etc. Address P. O. Box 88, Tulsa—Adv.

Oil leases for sale. N. W. of N. W. of 24-15-41. Phone 1805 Cedar.

Kansas drilling contract offer liberal blacks-for well in Greenwood or Lynn county. See C. E. M. Murdoch, 605 Kennedy. Address C. H. Edwards, P. O. Box 113, Wichita, Kan.—Adv.
